Re: JSJ Enterprises at 45 Gwynns Mill Court
Forest Conservation Variance
Tracking # 02-20-3137

Dear Mr. Leary:

A request for a variance from the Baltimore County Code Article 33, Title 6 Forest Conservation was received by this Department of Environmental Protection and Sustainability (EPS) on January 10, 2020. The requested variance would allow the calculation of the afforestation requirement to be based on proposed 0.2-acre limit of disturbance (LOD) rather than the entire one acre property to construct two additions onto the commercial building.

The Director of EPS may grant a special variance to the Forest Conservation Law in accordance with criteria outlined in Section 33-6-116(d)(1) of the Code. There are six (6) criteria listed in Subsection 33-6-116(d) and (e) that shall be used to evaluate the variance request. One (1) of the criteria under Subsection 33-6-116(d) must be met, and all three (3) of the criteria under Subsection 33-6-116(e) must be met, in order to approve the variance.

The first criterion (Subsection 33-6-116(d)(1) of the Code) requires the petitioner show the land in question cannot yield a reasonable return if the requirement from which the special variance is requested is imposed and will deprive the petitioner of all beneficial use of his property. The applicant is seeking to expand an existing commercial building. However, full compliance with the afforestation requirement does not deprive the petitioner of all beneficial use of the property, only the cost of complying with the law. Consequently, we find that this criterion has not been met.

The second criterion (Subsection 33-6-116 (d)(2) of the Code) requires that the petitioner show that their plight is due to unique circumstances and not the general conditions of the neighborhood. The need for the variance arises from the petitioner's request for relief from the full afforestation requirement rather than conditions of the neighborhood. Therefore, we find the second criterion has been met.

The third criterion (Subsection 33-6-116(d)(3) of the Code) requires that the petitioner show that the special variance requested will not alter the essential character of the neighborhood. The

proposed redevelopment is consistent with the current use of the property and the character of the commercial neighborhood. Therefore, we find that granting the requested variance will not alter the essential character of the neighborhood; thus, this criterion has been met.

The fourth criterion (Subsection 33-6-116(e)(1) of the Code) requires that the granting of the special variance will not adversely affect water quality. The development project would not impact any forest or surface water resources. Therefore, we find that granting of the special variance will not adversely affect water quality and that this criterion has been met.

The fifth criterion (Subsection 33-6-116(e)(2) of the Code) requires that the special variance request does not arise from a condition or circumstance that is the result of actions taken by the petitioner. The petitioner has not taken any actions that would necessitate this variance prior to its request. Therefore, this criterion has been met.

The sixth criterion (Subsection 33-6-116(e)(3) of the Code) requires that the Director of EPS find that the special variance, as granted, would be consistent with the spirit and intent of Article 33 of the Baltimore County Code. The requested variance is consistent with EPS policies regarding application of the Forest Conservation Law to redevelopment. Therefore, we find that the current variance request is consistent with the spirit and intent of the Law and that this criterion has been met.

Based on our review, this Department finds that required criteria have been met. Therefore, the requested variance is hereby approved in accordance with Section 33-6-116 of the Baltimore County Code with no conditions since forest conservation calculations are rounded to the nearest tenth acre, and the afforestation requirement resulting from this variance is less than 0.1 acre. However, any changes to site layout may require submission of revised plans and a new variance request, and the following note must be on all plans for this property:

A variance was granted by Baltimore County EPS to the Forest Conservation Law on January 15, 2020 to allow the afforestation requirement to be based on the 0.2-acre limit of disturbance to construct two building additions rather than the entire 1-acre property. As a result, no afforestation was required. Any future development activity at the property will require full compliance with the Forest Conservation Law.

Please have the property owner sign the statement on the following page and return a signed copy of this letter to this Department within 21 calendar days. Failure to return a signed copy may render this approval null and void, or may result in delays in the processing of plans for this project.
